Incoming animals will be housed on a first come basis.

Health Requirements

Livestock known by the exhibitor to have an infectious, communicable disease or to have been exposed to an infectious, communicable disease, or to be from a quarantined herd or flock may not be entered in the exhibition. **Warts and ringworm are considered communicable diseases.** **Therefore, livestock affected by these diseases cannot be exhibited. A statement from a veterinarian that an animal is being treated for these diseases is not acceptable.**

All livestock may be inspected by the Official Veterinarian on the opening day of the exhibition. The Official Veterinarian will order the immediate removal to a quarantine facility or removal from the exhibition premises of any livestock with symptoms of infectious or communicable diseases. Animals placed in a quarantine facility must remain there until removed from the exhibition premises. They may not enter a show ring. This includes livestock with warts or ringworm.

All testing must be conducted prior to the exhibition, and a record of the test results on a test chart or Intrastate Certificate of Veterinary Inspection must accompany the tested animals.
